

## Solenvis SL124 Hawke Rangefinder Specifications

The Solenvis SL124 Laser Range Finder monoculars provide instant distance measurements consistently and accurately. The outstanding optics provide a sharp and clear image under all conditions.

Designed with an eye safe CE approved laser, with automatic power off for energy saving, it gives a clear digital distance indication at the press of a button.

By selecting "RAIN" mode, the distance can be measured without any influence in rainy conditions. By selecting >150 mode, the influence of the objects such as overhead electric cables and tree branches affect can be eliminated.

The range finder can be used for distance measuring in hunting, playing golf, construction and site survey.

Distance	15m - 999m
Magnification	8x
Objective Lens	30
Prism	BK7
Exit Pupil	3.6mm
Eye Relief	13mm
FOV	122m / 1000m
Waterproof	NO
Angle Indication	NO
Dimensions	126 x 84 x 45
Weight	266g
Power	3V CR2
Accuracy	+/- 0.5m
